Pickup Pattern
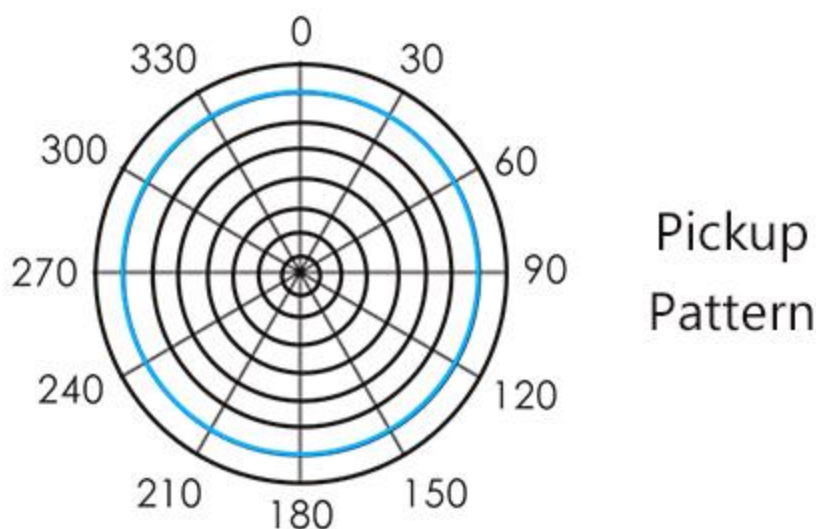

● Precautions

Thank you for purchasing the MillSO MQ7 USB microphone, please read this user manual carefully before use.

1. Can not be used in a humid environment.

2. Can not be used on equipment that exceeds the working voltage of this microphone. The working voltage of this product is 4.5-5V.

3. When it is not used for a long time, please unplug the microphone.

4. When using, do not tap the microphone to avoid damaging the parts.

● Operation
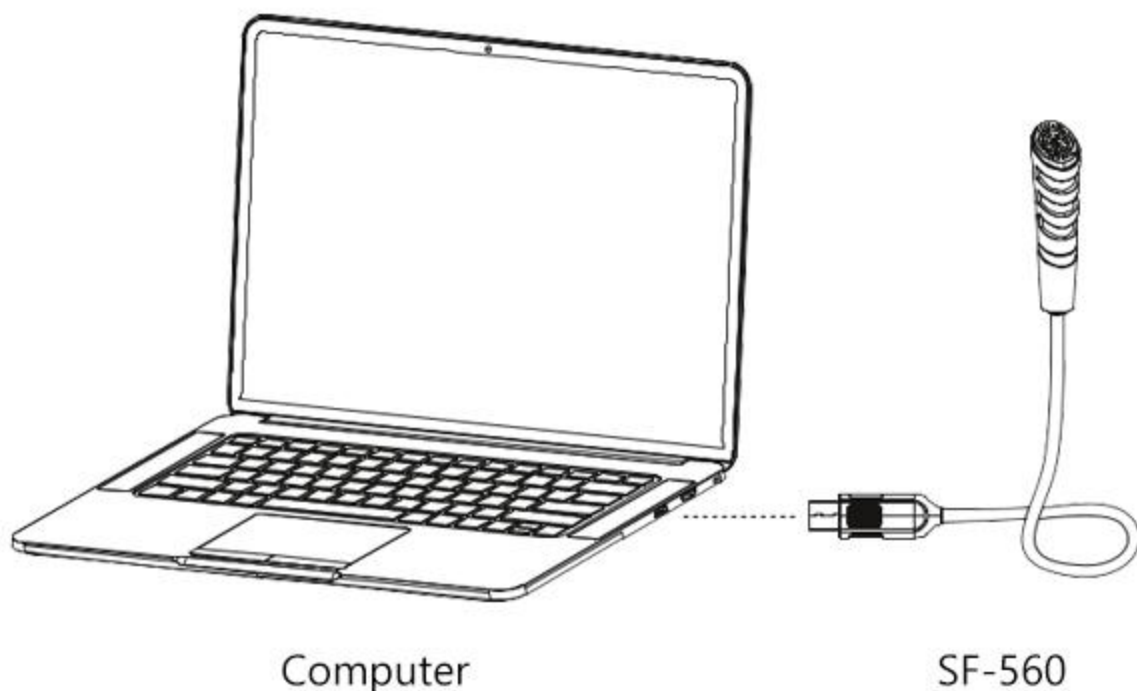

Computer   SF-560

● Computer Settings

❶ Apple MAC OS

1. Microphone Input Setting

● Click the icon in the upper left corner of the system, select "**System Preferences...**"
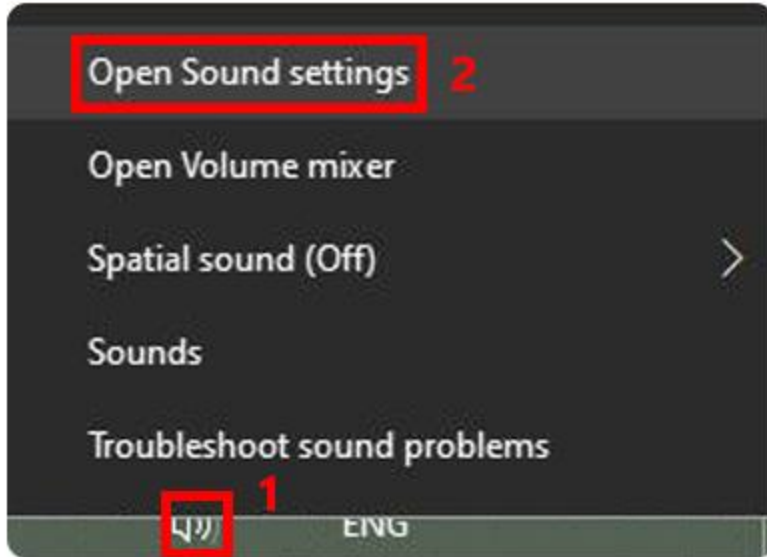

● Select "**Sound**", open "**Properties**"

● Select "**Input**", then select "**SF-560**" microphone as default input device, drag the "**input volume**" progress bar to adjust the microphone gain.
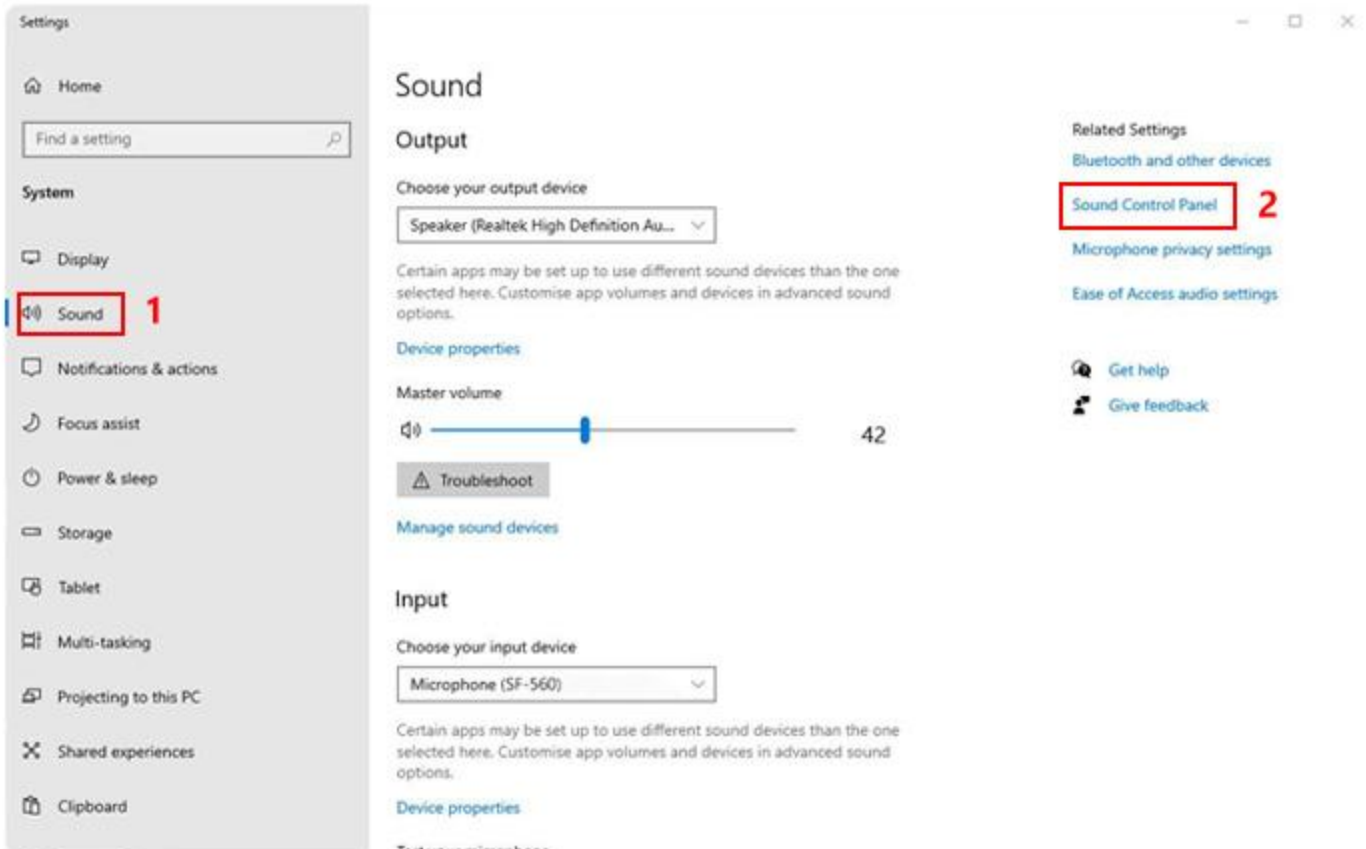

❷ Windows Setting

1. Microphone real-time listening and input gain setting (no setting required for normal use).

● Right-click on the sound icon in the system tray and select "**Open Sound Settings**".

● Left click to select "**Sound**", then select "**Sound Control Panel**".

● Select "**Recording**", double click to select **SF-560** microphone.

● On to the "**Listen**" tab, if you need to monitor when recording, check the "**Listen to this device**" button, then click "**OK/Apply**" to save the settings.

Notice: This listen function is for testing the micro-phone. If you don't need to hear your own voice, please don't turn on the listen function.

2. Microphone Gain Setting

● On the "**Levels**" tab, you can adjust the volume according to your personal preference.
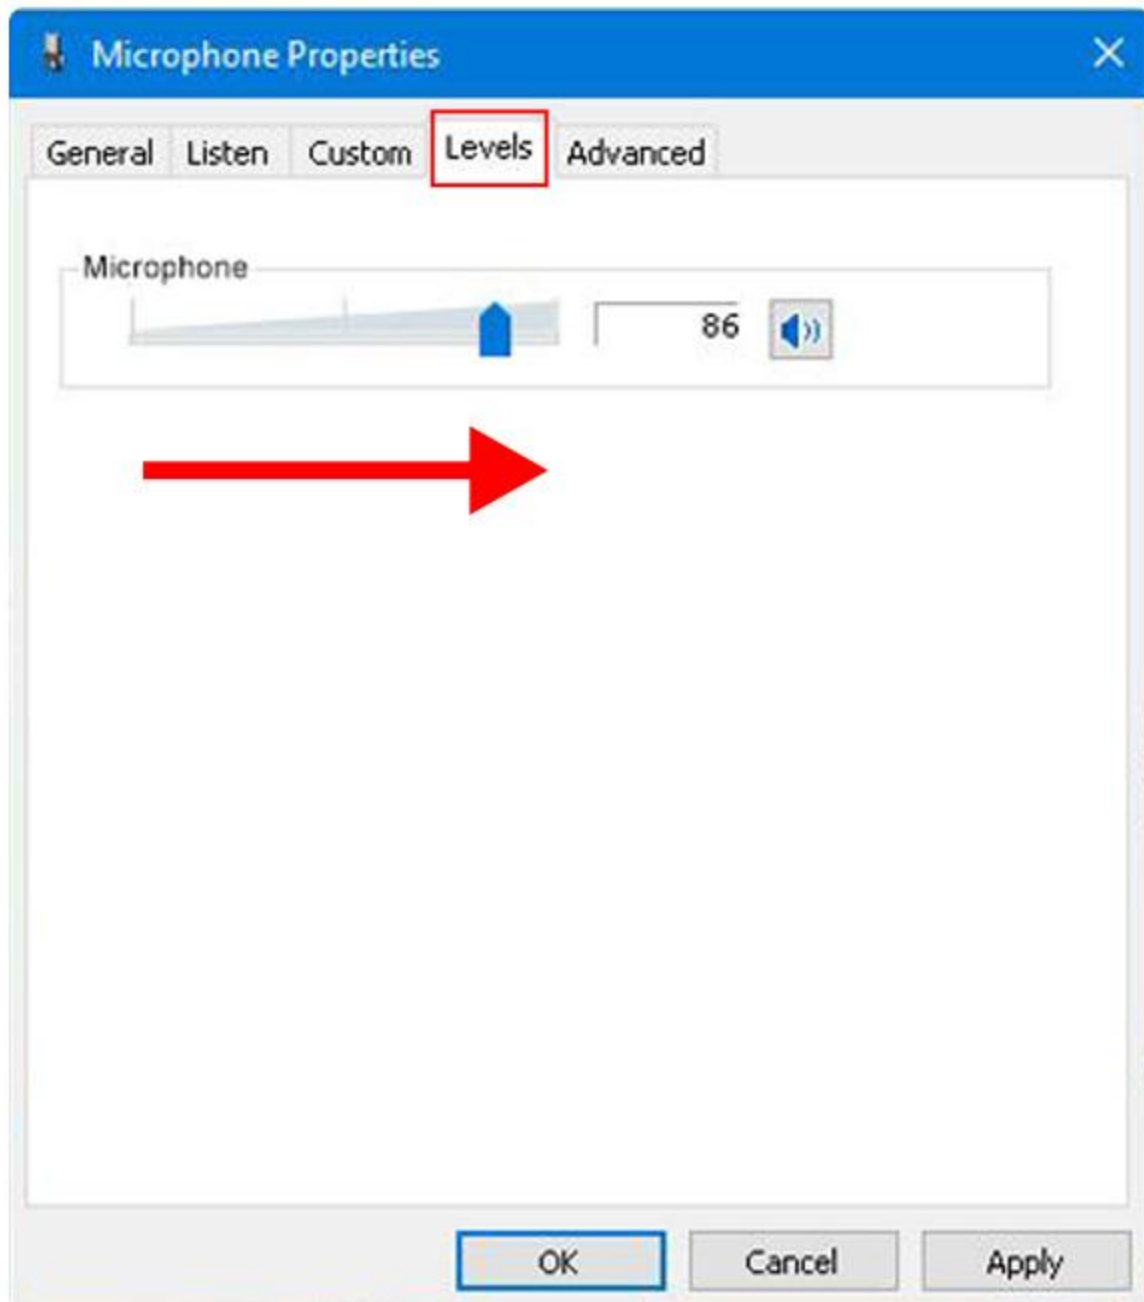

Notice: Since each computer system is different, the volume of the microphone needs to be adjusted according to the respective computer.
